

The image is a comprehensive wireframe for a web application, likely a product catalog or e-commerce site. It is divided into several key sections:
1. **Top Navigation Bar**: Features a search input field on the left, a large main title 'Titre' in the center, and two circular profile icons on the right.
2. **Sidebar**: Located on the left, it contains a search filter with a dropdown menu and a list of horizontal bars representing additional filters or categories.
3. **Main Content Area**: A large grid displaying product cards. Each card includes:
 - A placeholder for a product image.
 - Product name ('nom du produit').
 - A price reduction indicator ('-25%!!!') and a comparison between 'Ancien-prix' and 'NOUVEAU PRIX'.
 - A detailed product card below the first row, containing:
 - A product image.
 - Product name and price.
 - A short description ('petite Description / caractéristiques techniques').
 - A stock status ('En stock').
 - A star rating system with five stars, two of which are filled.
4. **Pagination Bar**: At the bottom, it includes navigation buttons: 'début' (first), 'précédent' (previous), 'numéro pages' (page number), 'suivant' (next), and 'fin' (last).
The wireframe uses a clean, minimalist style with gray lines and placeholder text to illustrate the layout and functionality of the application.
